INDUCTORS

Transponder coils

TPL series (for automotive)

AEC-Q200

TPL802727 type

FEATURES

- Transponder coils that ensure high reliability suitable for automotive applications.
- Small size (8mm in length) and high inductance (18.52mH max.) are achieved.
- Achieves stable electrical characteristics due to their high SRF design structure.
- Ensures high reliability suitable for automotive applications by adopting higher heat resistance wire and welding wire connection.
- Operating temperature: -40 to +125°C (including self-temperature rise)
- Compliant with AEC-Q200

APPLICATION

- Mainly receiving LF antenna coils for the in-car devices shown below
 - Tire-pressure monitoring system (TPMS)
 - Keyless entry system
 - Immobilizer etc.
- Other electronic devices

PART NUMBER CONSTRUCTION

TPL	802727	-	722	H
Series name	LxWxT dimensions (mm)	Inductance (mH)	Inductance tolerance (%)	
	802727 8.0x2.7x2.7			

CHARACTERISTICS SPECIFICATION TABLE

L*	Q	Measurement frequency (kHz)	DC resistance (Ω)	Part No.
(mH)	Tolerance	min.	max.	
18.52	±3%	40	125	240
7.20	±3%	35	125	105
4.91	±3%	30	125	85
4.50	±3%	30	125	80

* This inductance value is an example of the current commercial product. If a different inductance is needed, please contact us.

TEMPERATURE RANGE, PACKAGE QUANTITY

Operating temperature range*	Storage temperature range	Package quantity
-40 to +125 °C	-40 to +125 °C	2500 pcs/reel

* Operating temperature range includes self-temperature rise.

⚠ Please be sure to request delivery specifications that provide further details on the features and specifications of the products for proper and safe use.
Please note that the contents may change without any prior notice due to reasons such as upgrading.

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using these products.

REMINDERS

- The storage period is less than 12 months. Be sure to follow the storage conditions (Temperature: 5 to 40°C, Humidity: 10 to 75% RH or less).
If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
 - Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
 - Before soldering, be sure to preheat components.
The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.
 - Soldering corrections after mounting should be within the range of the conditions determined in the specifications.
If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
 - When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
 - Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
 - Use a wrist band to discharge static electricity in your body through the grounding wire.
 - Do not expose the products to magnets or magnetic fields.
 - Do not use for a purpose outside of the contents regulated in the delivery specifications.
 - If an ultrasonic process is used, thoroughly check the condition setting in order to prevent disconnection.
 - Do not clean the products with solvents. If a potting resin or a moisture-proof coat containing a solvent such as acetone, toluene or xylene is used, consult with us in advance.
 - The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.
The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.
