BAS40 THRU BAS70

Surface Mount Schottky Barrier Diode 200 mWatt

Features

- SOT-23 Package For surface mount application
- Protects from line to V_{CC} and line to ground
- Low forward voltage and reverse recovery characteristics
- Bidirectional-low-forward available with " -04" suffix (Figure 2)
- Tape & Reel EIA Standard 481.

Mechanical Data

- Case Material: Molded Plastic. UL Flammability Classification Rating 94V-0
- Mounting Position: Any
- Weight: .008 grams (approx.)

MAXIMUM RATINGS

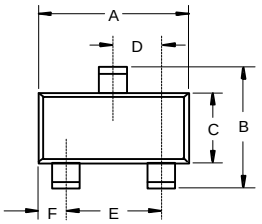
- Operating Temperature: -55°C to +125°C
- Storage Temperature: -55°C to +150°C
- Power Dissipation: 200 mWatts @ T_{amb}=25°C
- Forward Continuous Current: 200mA @ T_{amb}=25°C
- Surge Forward Current: 600mA @ t_p<1s, T_{amb}=25°C

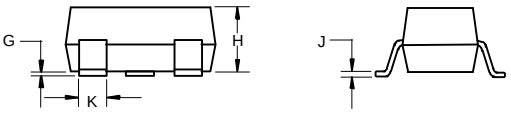
DESCRIPTION

Various configurations of Schottky barrier' s diodes in SOT-23 package are provided for general-purpose use in high-speed switching ,mixers and detector applications. They may also be used for signal integrity and counteract the transmission-line effects with (PC) board trances by clamping over/and undershoot from signal reflections with the schottky-low-threshold voltages.

This type of termination also does not depend on matching the transmission line characteristic impedance, making it particularly useful where line impendance is unknown or a variable. This methode of termination can control distortions of clock, data, address, and control lines as well as provides a stabilizing effect on signal jitter. It can also significantly reduce power consumption compared to standard resistor-based termination methods.

SOT-23





DIMENSIONS					
	INCHES		MM
